## Treehouse Plan & Budget

The Mix & Match Mountain contractors can't wait to see your treehouse plans and budgets!

Before you submit your plans, you need to make sure you have all the necessary information.

1. A clearly labeled floor plan with dimensions, area and perimeter.
2. An inventory of all of your building materials with their costs.
3. The total cost of all of your supplies.

## Reminders

- **Area** is the amount of space your treehouse takes up, how many tiles did you use? Your area needs to be smaller than 20 x 20.

- **Perimeter** is the length of all of the outer edges combined. It's the rim or fence you would need for your area.

- Your budget is **\$650**. Supply costs:

**Windows (Green tiles): \$15.36 each**

**Doors (blue tiles): \$23.87 each**

**Hatches (red tiles): \$41.74 each**

**Wood (yellow tiles): \$2.75 per piece**

-Don't forget to save money in your budget for accessories! Check in with a teacher when your plans are complete.
