

Good morning!

Antsy, Fan C., and Grant have been so INFLUENCED by plants that they have decided to make their own. After creating his plant, Grant exclaimed, "Oh my goodness! My plant is symmetrical!"

"Oh, you mean that there is an exact matching of parts on opposite sides of a dividing line? Like that plant beside Grant?" Antsy responded.

"Symmetry is everywhere!" announced Fan C. "Like this letter A, this cookie, and even the two of you!"

The **3** ants got started building symmetrical plants, but they need your help finishing them. Pick a half-finished plant and help design the other side. Build, draw and record your design. Have fun!
