

# Good Morning!

I stayed up all night making my web in the Discovery Area. Do you like it? It is a lovely home, but really just a temporary one. I hear you are planning a garden in a quiet nook of your playground! It sounds like a wonderful place to make my permanent home!

While building my web, I overheard Nikki and Omar discussing the placement of the flower boxes for the garden. I didn't hear all the details, but I know that the boxes are going to be rectangular.

I am curious to learn how much space they will cover and what they could look like. Maybe you have some ideas?

Check with a teacher to learn the **area** (number of cubes) of one of the flower boxes. How many different rectangular flower boxes can you design with that area? Choose the manipulative you would like to work with this morning.
