

All right boys,
it's time to load 'em up
and move 'em out!

That is some
wood pile!

The loggers
have cut a section
of forest and have
a pile of logs ready
to be taken to the
mill. These logs will
be used for building
new schools &
homes
and even turned into
paper !

There are 4 trucks on this job site. The truck drivers will be paid per log so the logs need to be divided evenly among the trucks to ensure equal pay.

See your teacher to discover how many logs you have in your wood pile.

Divide them equally among the 4 trucks and find how many fit on each.
