

Good morning! Today is Thursday, October 18, 2012.

Benny, Henry, Jessie and Violet are excited to enter some of the contests at the fair in order to raise money to buy the book *The History of Greenfield* for Grandpa's birthday. Their first idea is to make a **blueberry** pie for the baking contest.

See a teacher to find out how many **blueberries** they need to pick to make the pie. If they **divide** the picking job **equally**, how many **blueberries** does each child need to pick?
