

The renovations of the shops are complete! They're almost ready to be filled with tools and supplies. Once again your math skills are needed.

The shop keepers need to figure out where everything will fit. It's time to flex our measuring muscles...

Remember measure **TWICE**, cut **ONCE**!

Let's practice measuring. Pick one thing in the room that you will use to measure with. Now use that item to measure:

- A BENCH
- THE CIRCLE RUG
- A BOOKSHELF
- A TABLE
