

Welcome!

The animals in the meadow have decided to turn part of the land into a **garden bed**. Let's help them plant their rows of crops. Grab a sheet and a die  and let's get started.

1. Give the die a roll and gather that many units.

2. Remember once you have **ten units** you can trade for one vegetable row.

3. Once you have all **ten rows** you can trade for a finished garden bed!

You are welcome to work together to build one garden bed or play against each other (two boards, **one** dice). Good luck and happy planting!
