

WELCOME TO THE
Animals of Central Park Annual Picnie! (ACCPAP)

Thanks for your help with folding picnic blankets yesterday! Now it's time to pass out the yummy food!

What's for lunch, you wonder?
Why, **peanut butter + jelly** sandwiches!

We need to help divide whole sandwiches up into equal parts for the animal guests. How many different ways can you split up a sandwich into equal **fractional parts**?

Build, record and write equations that show your solutions. Also, please be sure to label each part of your sandwich with its **fraction**.
