

Good Morning!

It is time for **March Minute Madness!**

We will be taking a **1** minute challenge on several different activities.

To get started:

1. Find a partner.
2. Choose **1** activity card from the basket below.
3. Take turns finding out how many times you can complete this activity in **1** minute while your partner watches the timer.
4. When **1** minute is up record the number on your Math Vitamin sheet. After both partners have gone, add your numbers together to find the total.
5. Have fun!!!

When you are done with this **1** minute challenge and have recorded your sum, check in with a teacher to find out where to record your information.

How many
play dough
balls can
you make?

How many
beads can
you move?

How many
times can
you hop on
one foot?
