

Good morning! Today is Tuesday, October 23, 2012.

Our read aloud characters, Henry, Benny, Violet and Jessie have met two new buddies, Courtney and Michael. Courtney and Jessie are working together to create some beaded bracelets for the craft contest at the fair. They plan to make 6 beautiful bracelets. See a teacher to see how many total beads they have to *÷ divide evenly ÷* between the 6 silver wires. How many beads will be on each bracelet? Build, record and write an equation for your solution. Have fun!
